introduce PPE recycling to your organization today.

LifeCycle revive: recycling Canada's PPE waste.

LifeCycle is a fully circular Personal Protective Equipment (PPE) waste collection and recycling program. PPE waste is collected, sterilized, and formed into pellets. These pellets will be used to create non-woven textiles used in disposable isolation gowns and injection-molded items used in healthcare. These items can be recycled at the end of their life, forming a circular life cycle.

how it works.

COLLECT

Our specially designed bins allow you to safely collect PPE. Bins can be placed in public areas around your store/facility.

STORE

When bins are full, store them in your warehouse on pallets. Let us know when a truckload is available.

TRANSPORT

At your scheduled pickup time, we retrieve filled boxes and drop off empty boxes. We transport to our plant in Brantford, Ontario, for reprocessing.
